

PHYLUM MOLLUSKA
The Living Ocean Pg 219

Name: _____ **Date:** _____ **Period:** _____

1. Phylum Molluska includes what animals?
2. What are the 3 common features that most molluskans have?
3. What does a chiton's mantle produce?
4. Snails are in which class?
5. Describe the radula that herbivorous snails have.
6. Describe the radula that carnivorous snails have.
7. Define **proboscis**.
8. Which class are clams, mussels, oysters and scallops found in?
9. How can you tell as scallop from a clam?
10. How do scallops move?

Figure 6-7 and 6-8:

- A. Label the following figures according to pages 226 & 227.
- B. Color the pictures using different colors for each part of the clam. (You may run out of colors, so use dark red, light red, dark blue, light blue, etc.)

*** Make sure to use the same colors for the same parts for both figures (ex: all gills are dark green in both pictures).
